Digest

U.S. Agricultural Exports Advance from a Year Ago (see p. 2). Exports of farm products during the first 7 months of FY 1992 advanced \$3.1 billion from a year ago boosted by gains in wheat, soybeans, meat, poultry, fruits, nuts, and vegetables.

Agricultural Imports Rise 4 Percent (see p. 5). U.S. farm product imports during the first 7 months of FY 1992 totaled a record \$14 billion, up 4 percent over the same period last year. Gains occurred both in competitive products, such as cheese, casein, grains, and fruits and vegetables, and such noncompetitive commodities as cocoa, bananas, natural rubber, spices, and tea.

California Maintains Lead in Agricultural Exports (see p. 6). Estimated agricultural exports from California totaled \$4.6 billion in FY 1991 compared with less than \$4.4 billion in FY 1990, while exports declined from Iowa, Illinois, Nebraska, Kansas, and Minnesota. States that shipped high-value products benefited from the strong growth in exports of meat, fruits, vegetables, and tobacco. Total U.S. agricultural exports in FY 1991 were down more than 6 percent from year-earlier levels, primarily because of lower bulk commodity shipments and lower prices.

U.S. Agricultural Exports Advance from a Year Ago

U.S. agricultural exports, though down in April from March levels, advanced by \$50 million from April 1991. Seasonally lower shipments of oilseeds, cotton, and tobacco more than offset increases for wheat and coarse grains, resulting in a 1-percent decline in agricultural exports for the month. April 1992 exports, however, topped the year-earlier value as wheat, meat, and soybean shipments substantially outperformed last April's. Seven-month cumulative farm product exports totaled \$26.3 billion compared with \$23.2 billion during the same period of FY 1991, with gains in wheat, soybeans, meat, poultry, fruits, nuts, and vegetables.

April's wheat export volume rebounded 13 percent above March's to 3.2 million tons, with larger shipments to Egypt, Japan, Taiwan, Bangladesh, and several smaller markets. Wheat prices continued to climb, with export unit values averaging \$135 per ton. As recently as January 1992, averages were less than \$120, and in April 1991, about \$100. For the fiscal year through April, export volume jumped 46 percent to 22.8 million tons, and value surged 67 percent to \$2.7 billion. About one-third of the more than \$3-billion increase in U.S. agricultural exports this year is attributable to larger wheat exports to the former Soviet Union, China, Japan, Egypt, and South Asia.

Corn exports recovered in April to 3.6 million tons, following a temporary drop during March when shipments to Japan, the former Soviet Union, and Korea fell. April's increases reflected larger shipments to Japan, Taiwan,

Algeria, and Mexico. However, export volume for the fiscal year dropped 15 percent owing to decreased imports by the former Soviet Union, Korea, Mexico, Spain, and North Africa.

Soybean exports fell 10 percent in April to 1.5 million tons, with sharply reduced shipments to Western Europe, especially to Spain and the Netherlands. Increased exports to Japan and Taiwan offset some of these losses as total export tonnage exceeded April 1991's 1.1 million tons. During October-April 1991/92, U.S. soybean export tonnage grew 37 percent due to increased shipments to Japan, Taiwan, Mexico, Western Europe, and the former Soviet Union. South American crops have been harvested, but dockworker strikes in Brazil impeded exports.

U.S. cotton exports during April fell to 155,000 tons worth \$217 million as prices continued to drop and availability from other sources increased. There were reduced shipments to Japan, Korea, and Southeast Asia. Exports for October-April dropped 15 percent from last year, as Japan, Korea, and China imported less.

Grain sorghum exports reached a new high in April, 1.1 million tons, slightly exceeding the previous record of 1 million tons set in February. More than 5.4 million tons have been shipped during the current fiscal year, 1.4 million above the previous year, with most of the additional demand coming from Mexico where dry conditions reduced last year's crop, and excessive rains damaged crops this year. Agricultural Imports Rise 4 Percent

U.S. imports of farm products gained 4 percent in value during the first 7 months of FY 1992 and totaled a record \$14 billion, compared with \$13.5 billion over the same months in FY 1991. Increases were about equally divided between competitive and noncompetitive products. Competitive commodities expanded to \$10.5 billion due to higher values for dairy products, grains, fruits, and vegetables. Most of the increases for fruit, fruit juices, and vegetables stemmed from sharply higher prices. Apple juice import unit values jumped about 44 percent over year-earlier levels. Noncompetitive agricultural imports rose 6

percent to \$3.5 billion paced by stepped up purchases of cocoa, bananas, natural rubber, spices, and tea.

Canada continued as the main source of U.S. farm product imports, with strong growth in live cattle, beef, grains and feeds, orange juice, and vegetable oils. Imports from Mexico fell 12 percent to \$1.5 billion. Declines for coffee, cattle, orange juice, and tomatoes offset gains in bananas, melons, strawberries, apple juice, and several fresh vegetables. Imports from Brazil also fell, especially for coffee and cocoa. (Thomas A. Warden, Commodity and Trade Analysis Branch, 202-219-0822)

California Maintains Lead in Agricultural Exports

California's agricultural exports continued to expand in FY 1991 as high-value products remained strong. Texas moved into fourth position from fifth largely due to increased exports of high-value products. Iowa and Illinois were second and third, respectively. Commodities showing sizable growth trends in FY 1991 included live animals, meat, poultry, fruits, vegetables, tree nuts, and seeds.

Total U.S. agricultural exports fell 6.6 percent in FY 1991 from the \$40.3 billion shipped during FY 1990 primarily because of declines for bulk products, such as wheat, coarse grains, and soybeans. In addition, prices of many bulk products fell, producing lower foreign exchange income of States dependent on bulk-product exports. Estimated exports from Iowa, Illinois, Nebraska, Kansas, and Minnesota decreased during FY 1991.

U.S. exports of high-value agricultural products like meat, fruits, vegetables, and tobacco reached a record \$20.4 billion in FY 1991, up \$1.5 billion from the previous year, benefiting California, Texas, North Carolina, Kentucky, Florida, and New York. High-value products now make up more than half of the value of U.S. agricultural exports, supplying such major markets as the European Community, Japan, Canada, Taiwan, Hong Kong, and Mexico.

State agricultural exports estimates in this article were based on each State's production or sales of individual commodities reported by the National Agricultural Statistics Service (NASS). It is assumed that each State received export revenues in the same proportion as its production. Customs District export data or wheat shipments by type based on Federal Grain Inspection Service information supplemented NASS statistics. (Thomas A. Warden, Commodity and Trade Analysis Branch, 202-219-0822)
